Deadline for manuscript
submissions:

30 October 2018

Message from the Guest Editors

Dear Colleagues,

This Special Issue welcomes the submission of full manuscripts of abstracts presented at the 14th International Society for Equitation Science Conference. Manuscripts reporting research related to good training, good feeding, good housing, good health, appropriate behaviour, and the human-horse relationship will be considered with the aim to enhance and safeguard the welfare and the health of the performance horses during training and non-training periods.
